

March 20, 2020 – Campus goes online from Monday

Dear students,

The health and wellbeing of our students is of utmost priority. We are also committed to making sure that you have a successful trimester and will work closely with you to make this the most seamless and positive experience as possible.

ACAP has been fortunate not to have reported any confirmed cases of COVID-19 at any of our campuses to date. The decision to transition to online learning, aligns with our goal to practice safe social distancing, slow the rate of transmission, and protect our communities and all our families. Starting Monday 23rd March 2020, face-to-face on-campus classes will cease. Until notified, all classes will be delivered online using Zoom, Moodle, and the student portal.

Campuses will remain open

Campuses will remain open for students who do not have the resources or technology needed for online classes. You will still be able to use laptops and the campus internet but on campus you will have to follow [social distancing guidelines](#).

Online study tools

All lectures, tutorials and class discussions will now take place in collaborative online settings. If you are new to online classes, we encourage you to read and watch the videos and tutorials that we will be sending you over the coming days to ensure you can actively participate and be successful in your studies.

International students

Please be assured that you can participate in online classes without concern for your immigration status, provided you continue to make normal progress in a full course of study as required by federal regulations. This flexibility has been confirmed and announced by [TEQSA](#).

A new webpage is launched

We have a new webpage which will be continually updated, providing all the information, updates and tools to help you study and be able to continue with your academic work.

Best of luck with your studies, and please take care of yourselves during this challenging time.

Warm regards,
George Garrop
